U - Temp

Single use temperature logger - Pdf report

Description:

- Single use temperature logger
- Temperature range -30°C to +60°C
- Registration interval: 10 minutes
- Autonomy: 60 days
- Battery power included
- Keep unit inside bag for IP67 and food protection
- Automatic generation of PDF report on PC connection
- GDP/BPD compatible

Simple operation:

1. Pressing the button will start recording
2. Temperature logged at regular intervals (10 minutes standard)
3. Upon arrival, logger connection to a USB port automatically generates PDF report including all measures

The U-Temp data logger is ideal for monitoring and tracing temperature during the storage and transport of temperature sensitive merchandise

Applications: Transportation, Food & Beverage, Pharmaceutical & Building and Site Monitoring
